

## ARE YOU A TOP PERFORMER ?

These leading renewable energy developers are all boosting their performance with the 3E SynaptiQ software service:

Belgium | Czech Republic | France | Italy

"Better information enables better analysis.

SynaptiQ enables us to identify the possible root cause of problems upfront. We are up to 5 times more efficient in identifying problems, with 80% efficiency gain. The most important is to be in control.

The way we work now couldn't have been done before SynaptiQ"

Iwein Goigne, O&M Manager, Enfinity

18.2 MWp installation in Les Mées in South of France.

Belgium | Italy | Netherlands | UK

"New markets require flexible thinking.

SynaptiQ and Oskomera Solar Power solutions worked as a team to complete the monitoring of our parks in the UK. This included the first ground based 5MW park in the UK.

SynaptiQ collects data from different sources and combines them into one reliable portal; Now we are ready for O&M in the UK."

Wouter Hendrickx, O&M Manager, Oskomera Solar Power Solutions

5 MWp group mounted PV in Cornwall, United Kingdom.

## Origis Energy

Belgium | Greece | Italy | Slovakia

“Accurate, relevant information at a glance, with the possibility to drilldown for detailed intelligence.  
The key is up-to-minute monitoring. Mobile and 24/7, which enables us to act fast and efficiently.  
The key is SynaptiQ.”

Tom Pottie, Project Manager, Origis Energy

1 MWp ground mounted installation in Greece.

Belgium, North Sea

“Having an overview of the park and transparent reporting through SynaptiQ allows us to better understand the performance, identify issues and prioritize actions. It also allows us to provide automated and customised reporting to all stakeholders.”

Kristof Verlinden, O&M Asset & Production Manager, Belwind offshore wind farm

165 MW Offshore Wind Farm off the Coast of Belgium.

Belgium | Czech Republic | France | Italy

"SynaptiQ gives us the capability to quickly prioritize, dispatch and solve any problems, which is key"

An De Tavernier, O&M Administrative Support, Enfinity

4MWp solar high speed train tunnel between Antwerp and Rotterdam.
